

ETN MONTHLY NEWS SUMMARY

APRIL 2017

IN THIS ISSUE:

- AGM and Workshop
 - o Last chance to register
 - o ETN needs your vote!
- New members
- Industrial Emissions Directive White paper
- Engine specific User meeting
- Best Practice awards
- Coming events

ANNUAL GENERAL MEETING & WORKSHOP

Last chance to register!

The Annual General Meeting (AGM) and Workshop of ETN will take place on 10 and 11 May 2017 in Oberhausen. Registration is open until Wednesday 3 May! Make sure not miss the deadline; late registrations **will not be possible** due to security matters.

Information on the agenda, accommodation and transports is available [on ETN's website](#) – access is limited to members and requires to be logged in. Expect valuable information, high level technical discussions, inspiring debates and precious exchange of experience!

The AGM and Workshop are organised with the support of our sponsors MAN Diesel and Turbo and the Lufthansa Group.

ETN needs your vote

As previously announced to our members in the previous issues of the Monthly News Summary and in a letter from our President Bernard Quoix, a vote will be organised during the AGM on the Board's proposal to modify our Articles of Association. To be valid, the vote requires the participation of at least 2/3 of our members: it is of paramount importance that your company/organisation takes part to it.

Each company/organisation that is a member of ETN has one vote. Only the official contact person for ETN within those members is entitled to cast the vote on their behalf. Please, make sure that your organisation will be present in person or represented: it is possible to vote by proxy or by email. You can contact Thibault Bouterin for more details: tb@etn-gasturbine.eu.

2 NEW MEMBERS JOIN ETN!

ETN is pleased to announce the arrival of 2 new members in its network. From the user community, Abu Dhabi National Oil Company ([ADNOC](#)) has joined ETN as a global member. ADNOC represents all the oil and gas companies within their national group. The second is

Transcanada Turbine ([TCT](#)), a service provider for Siemens and General Electric (GE) aeroderivative industrial gas turbines.

INDUSTRIAL EMISSIONS DIRECTIVE COMMITTEE

ETN's committee in charge of monitoring and reacting to the Industrial Emissions Directive and related regulations has worked on a white paper following the review of the BREF for Large Combustion Plants. This BREF - Best Available Technique (BAT) Reference Document – is a 964-page long document guiding the implementation of the Directive. The original version was published in 2006 and went through an in-depth revision last year. ETN believes that this reviewed version still leaves pending issues that need to be addressed, questioning the future of numerous gas-fired plants. Once published, the document will be sent to ETN's members, the European Commission, the industry stakeholders and the member states representations towards the EU and national regulation authorities.

ENGINE-SPECIFIC USER GROUPS

Industrial RB211

The Engine Specific User Meeting for the industrial RB211 will gather major oil and gas and power generation users to discuss with Siemens and MRO centres the needs and technical challenges that they are facing. It will take place on 4 and 5 May in Milan. More information on www.etn-gasturbine.eu/usergroups

LM2500

The user meeting for LM2500 is planned on 14 and 15 June in Brussels. Registrations are still open. Any question can be addressed to lm2500@etn-gasturbine.eu

BEST-PRACTICE AWARD:

ETN is collaborating with the Combine Cycle Journal to launch our best-practise award at a global scale. The best practise contest will start during the AGM, and will focus on EHS and workforce development topics.
