ETN LOGO

The ETN Logo can be used in 2 versions:
- The stylised "E" with only the "ETN" word mark underneath
- The stylised "E" with the complete name "EUROPEAN TURBINE NETWORK" to the right distributed over three lines

The stylised "E" can also be used separately as a graphic element throughout the communication.

The basic color for the logo is Pantone 289 or its equivalent in other color systems (see page color palette). It is composed of a 100% and a 25% shade of the basic color.

The logos can be used both in positive or reversed versions. If reversed version is used, it is preferably positioned on the basic color (Pantone 289 or equivalents).
