## “Pre-normative study on H-Gas Quality Parameters”

The Sector Forum Gas Working Group (SFGas WG) is a joint working group between Sector Forum Gas Infrastructure and Sector Forum Gas Utilization.

The aim of the group is to determine whether it is possible to define a Wobbe Index range that can be used within a revised version of EN 16726:2015 “Gas Infrastructure – Quality of Gas – Group H”.

The SFGas WG on Gas Quality has the following sub-groups:

- Chair Advisory Group (CAG)
- Task Force 1 “Wobbe Index” (TF1)
- Task Force 2 “National/Sectorial Situations” (TF2)
- Ad-hoc Group “Units and Definitions” (AhG)

Uniper is a member and represents ETN during these sessions.

ETN staff tried to reach the CEN SFGas Working Group without success for the moment.

# Ammonia Interest Group

The objective of the group is to gather information for defining new projects or finding new partners on the topic of NH<sub>3</sub> combustion, under the colours of ETN

This initiative was launched after the ETN Workshop in Genoa

**Supported by Rob Bastiaans, TU/e**
