Program TC4 / TC5

- Exhaust systems

  – ISO standard drafted and differences to ETN document identified

  – Will be discussed in ETN team, will provide feedback to ISO

- ETN Best Practice Award: finalized and winners in 2 categories selected (by CCJ)

- Digitalisation:

  – White paper created based on outcomes from last 2 workshops

  – Received inputs, exchange information with ETIP SNET WP4

  – Additional content: maturity model with <u>self-assessment</u> / <u>implementation</u> model

Overview of White Paper

- Information to the members:

  – What steps are needed to move onto the path of the digitalisation and unlock the value of the data (step by step procedure)

    • What are the difficulties we experienced in the past?

    • What does new technology have to offer?

    • How can we benefit from that? What are specific risks?

    • How to define the maturity level of organization?
      Where are you on digital journey towards industrial internet maturity?

- Inputs to developers on the requirements / gaps
