

PRESS RELEASE: ETN Board election 2022

Pedro Lopez, Chief Operating Officer, Asset Operations within Uniper has been re-elected as President of ETN Global at the Annual General Meeting on 29 March 2022 by the newly elected ETN Board of Directors.

Pedro Lopez will be supported by the re-elected Vice President Hege Rognø (Equinor), and the re-elected Board members Walt Steimel (Shell), Mick Conway (RWG Repair & Overhauls), Andy Williams (Chromalloy), Manfred Aigner (DLR), John Oakey (Cranfield University), Magnus Genrup (Lund University), Uwe Kaltwasser (Siemens Energy) and Gary Lock (Frazer-Nash Consultancy) as well two new Board members Sigrid Gijbels (Engie) and Marco Ruggiero (Baker Hughes).

“I would like to thank the ETN members for their confidence in me and for the re-election as President of the ETN Board for another two years at the Annual General Meeting end of March. In the last two years ETN has already made great progress to bring together the knowledge and determination of the most powerful players of the entire value chain of turbomachinery technology worldwide. Together we are a strong voice to foster the energy transition in Europe and worldwide. The Russian invasion of Ukraine, which we condemn in the strongest terms is a wake-up call to make Europe less independent from Russian energy imports as soon as possible. Dispatchable carbon-neutral energy solutions are of utmost importance to reach this goal and to ensure security of supply. ETN and its members will do everything to speed up the transformation to a low-carbon energy world.”

Pedro Lopez, Uniper
