1. REGISTRATION TO THE AGM

If a YEC Member registers to the AGM and is accompanied by colleague(s), the registration can be completed for free via a **code**.

To obtain the code, **please inform Nicolò Cairo (ETN)** before registering.

2. Update on current task-forces

ETN Hydrogen Gas Turbine report is being updated. The document was initially published in 2020 and will be presented at the October Workshop 2024.

3. Training & activities during ETN AGM

The purpose of this training is to share skills among ETN YEC Members. The YEC presenters and the topics of the training shall be defined in more detail.

Seven YEC members will be available to attend the training sessions.

4. ASME Turbo Expo 2024 Event proposal update & planning

A new timing for the YEC event has been proposed by ASME Turbo Expo 2024. The event would take place on Sunday, as there is no rooms availability during the week. YEC Members are in favour of the new proposal.

In addition to participating students at ASME, universities close to the London area will be contacted for the promotion of the event.

A separate networking event between students and young engineers will follow the event.

5. Master student's thesis competition planning

The competition will be opened soon, with the submission deadline on 29 March. It is suggested to create a YEC Committee to select the Top-20 and Top-5 papers.

A separate one, also composed by ETN Members, will be set up for the final phase of the competition.
