# Membership 2024

136 Members

# Agreed Strategy at the AGM in 2023

## Priority Activities

1. **To change the perception of our technology** as part of the clean energy future
2. **To accelerate the technology development**
  - ensure successful progress on ongoing projects
  - ensure valuable outcome of our Working Groups and engine specific User Groups
  - advocate a suitable regulation and resilient long-term energy policy
3. **Provide a high-quality networking and dissemination platform**
  - ETN's International gas turbine conference
  - Wide dissemination of result and outcomes of our PB, WG's & Projects
  - Make progress on the globalisation of ETN
4. **Facilitate access to a skilled workforce necessary to drive the energy transition within our technology sector.**

# Strategic Goals for 2023-2024

After Board review

**Overarching Goal 2023: “Changing the perception of our industry”**  
Positioning it as a vital component of the clean energy future and enhancing its appeal as a promising career opportunity.”

## Pathways and Goals 2023:

1. **Policy & Regulations:** Advocate for a suitable regulatory framework to improve investment conditions
2. **Research & Demonstrations:** Accelerating the development and demonstration of the agreed portfolio of solutions
3. **Globalising and growing ETN:** Strengthen a coordinated user voice

# AGM 2023 Activity Update
