

ETN Global user groups: status & outlook

Olav Johan Riisnes, Equinor

High Level User Meeting (HLUM)

Yearly meeting among the gas turbine user community

Objectives:

1. Discuss the technical needs and requirements of the gas turbine community
2. Review and explore proposed solutions
3. Discuss needs related to legislative and policy frameworks
4. Review ETN strategy and activities
5. Opportunity to propose new engine-specific user groups

 Input and recommendations to the ETN Board and Project Board

Engine specific user groups: a year in review

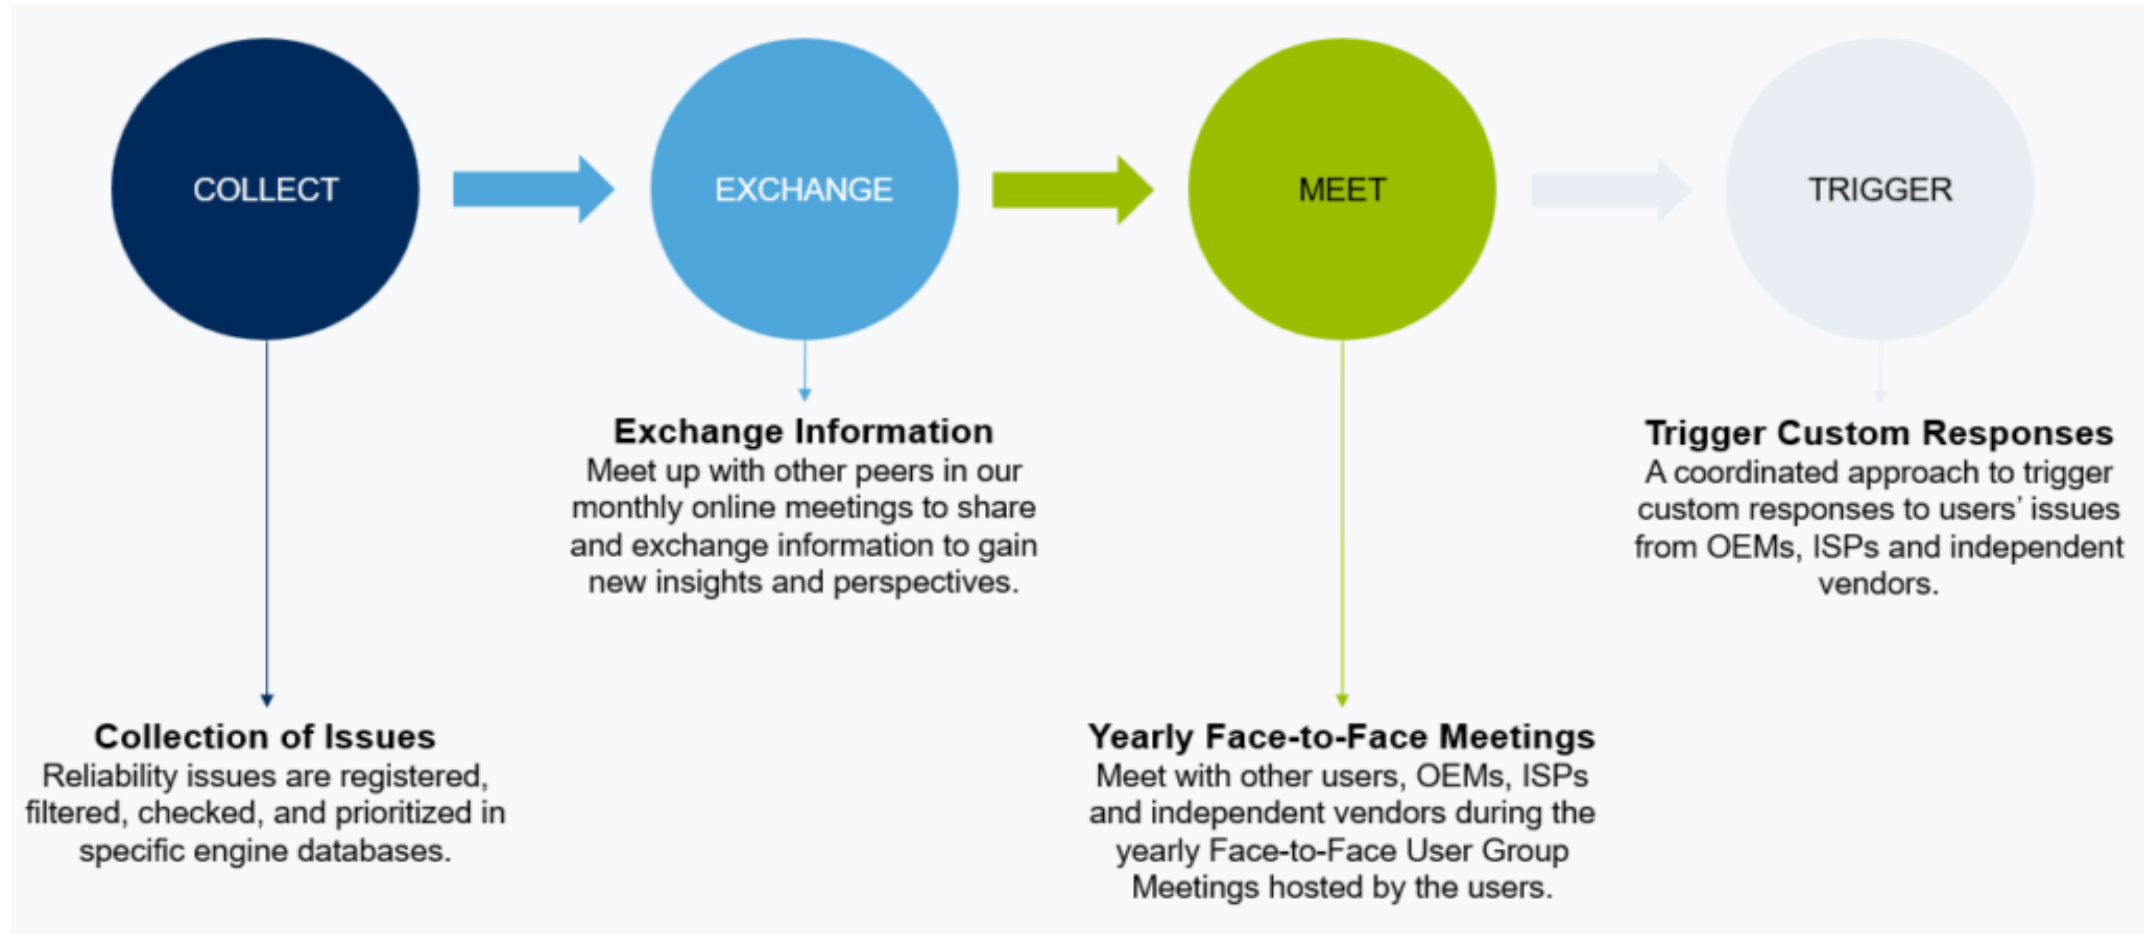

Key Objectives

Develop an independent, knowledgeable and coordinated user community

Guide the OEMs, suppliers and service providers to develop and implement new solutions.

- **Bringing together** and coordinating the voice of the user's community;
- **Providing a continuous and focused dialogue** between the user community, OEMs, suppliers and service providers;
- **Sharing user experiences** and best practices;
- **Defining, developing and implementing solutions** to improve gas turbine operations.

How Are User Groups Coordinated?

Formation of New User Groups

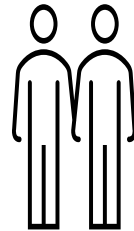

1. Specific Engine User-Group Proposal

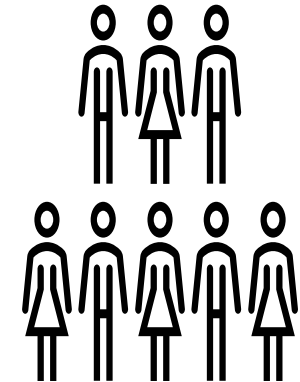

2. The proposer to review interest among the end-user community

3. Securing commitment from other end-users

4. Formation of user group once the goal of minimum end-users confirmed

5. ETN Global officially launches the User Group
